

Hosting — Revenue Variance Summary

Trailing 12 months ending December 2025 | History: Jan 2023 to Dec 2025

TTM Revenue \$702.5M	Variance \$ +\$25.0M	Customers 3.54M	ARPC / mo \$17.21	Churn / mo 4.7%
+3.7% vs plan	Favourable	+3.5% vs plan	-0.2% vs plan	MAPE 2.9%

Revenue Variance Bridge — Volume vs Rate

Component	Amount	Driver
Budget revenue (plan)	\$677.5M	Annual plan baseline
Volume effect	+\$25.4M	Δ customers × plan ARPC
Rate effect (ARPC)	-\$0.3M	Δ ARPC × plan customers
Joint / mix	-\$0.0M	Δ customers × Δ ARPC
Actual revenue	\$702.5M	Total variance +\$25.0M (+3.7%)

Forward Outlook — Next 12 Months

Scenario	Forecast revenue	Note
Bear	\$690.4M	Bottom-up driver model
Base	\$765.1M	Bottom-up driver model
Bull	\$840.0M	Bottom-up driver model
Top-down target	\$772.7M	+10% YoY; bottom-up gap -1.0% (agrees)

Key Takeaways

- Hosting revenue came in \$702.5M over the trailing 12 months, \$25.0M (+3.7%) above plan (favourable).
- Volume added \$25.4M: customer count ran ahead of plan, the larger driver of the gap.
- Rate (ARPC) cost \$0.3M: realised price per customer was below plan.
- Forecast accuracy: MAPE 2.9%, bias +3.0% (optimistic plan).

Generated 23 Jun 2026 by hosting_forecast. Driver model: revenue = average customers × ARPC. Favourable = actual above plan.
